4.9 Lab Exercise 4

CSF3133 Web-Based Interface Design

Home	Video	Form	About

Introduction

Web-based interface design is the process of creating the visual and interactive elements of a website or web application, focusing on aesthetics, usability, and user experience. It involves designing elements like buttons, menus, and typography to create an interface that is visually appealing, easy to navigate, and allows users to efficiently complete tasks. Key principles include consistency, feedback, and accessibility to ensure a positive and functional user journey.
